

H7

H7 features independently adjustable upper and lower backrests, providing targeted support for seven key areas: head, neck, back, lumbar, hips, legs, and arms. Its multi-dimensional adjustability ensures comprehensive spinal protection and lasting comfort.

Features

- The integrated headrest supports the head, neck, shoulders, and back without gaps
- Back height adjusts up to 71mm to fit users of different heights
- Lumbar support adjusts up to 42mm in depth to stay supportive during forward-leaning work
- The curved, high-resilience seat cushions the hips without pressing the sit bones or thighs
- The breathable mesh leg rest offers elastic support and fits the curve of the lower legs
- Backrest strength exceeds BIFMA standards by 1.2x for added safety while reclining
- Paint-free components reduce VOC emissions for a greener workspace
- The new velvet mesh is soft, breathable, and smooth against the skin
