

CAROL

Carol features a fully upholstered surface with soft, tactile leather for a warm, inviting touch. Its scientifically engineered dual-layer support distributes body pressure for all-day comfort. With a single-button recline function, it seamlessly transitions between focused work and restful relaxation, supporting every deep thought and decision with ease.

Features

- Armrests fully upholstered in leather from base to top, offering soft, supportive comfort whether leaning forward, reclining, or sitting sideways.
- The backrest and seat feature a dual-layer design: a soft top layer relieves pressure, while a firm base layer supports an upright posture and prevents sagging during long hours of sitting.
- 105° initial recline (single-lock position) reduces fatigue during sedentary work by evenly distributing spinal pressure.
- In unlocked mode, the chair naturally reclines with shifts in the user's center of gravity, allowing up to 24° of relaxed recline.
- Seat height adjustable by 2.36in, with armrests up to 26.97in, fitting standard desk heights without risk of collisions or damage.

Dual-Layer Seat Cushion, Soft and Supportive

One-Button Recline, Instant Relaxation

Zoned Padding, Ergonomically Contoured

Fully Leather-Upholstered Armrests, Soft Everywhere
