Most storage problems can be solved with one cabinet. The open shelves is for easy reach of frequently used objects while the closed top cabinet guards privacy. The high cabinet with a height of 1474mm contains a clothing hanging area, leaving plenty of space for long coats and wrinkle-prone clothes.

The cabinet-integrated desk has fine partition for clear storage of books and school supplies. The pegboard has magnetic accessories for personalized storage. More desktop space can be saved for efficient studying.

Residential space needs to have both functional and spiritual attributes. A cabinet is adopted between two beds for more storage and space partition for proper privacy.

Make full use of every inch of space by adding a drawer cabinet under the empty bed board. The seasonal bedding and clothes can be easily stored.

Humanized design for the bed head is featured by two back panels that form a storage space. The front panel is short so that objects can be easily reached. Thin panel is suitable for the clip-on table lamp. A Nightstand can be reduced to save more space.

The partition cabinet on the bed provides sufficient storage space for the user. It can protect personal privacy and isolate no space or light, so that the communication has no barriers.

Organized storage doesn't take up too much space. With the bed as the center, cabinets are equipped on both sides and above, the daily objects can be sorted and reached easily.

The spacious double bed with simple bedside table provides a one-stop space solution for teachers' dormitory and talent apartment.
